26. Non-Updated records

The Non-updated records function lists all your current scheme members whose employment(s) is not updated to the latest financial year-end.

If the member has concurrent part time posts of which neither are updated to the current year-end then they will have more than one entry on the list but these will display different employment identifiers.

The list displays the first 100 records are displayed but there is a facility to search the database for any of your members using their NI number. This search will find any of your current members not just those in the first 100.

Suggested ways to sort and action these records:

- To deal with members who may be near retiring age

Sort via "SD number - v" as this will list the oldest member first

- To action updates that have been outstanding the longest

Sort via "Update Year – v"

- Once you have identified a member whose update you wish to action it is also advisable to then do a search using their SD number as this will identify if there is more than one year that requires updating for the same member.

Any updates for the same member must then be submitted in year order via POL **SD55 Update**.

The list can also be printed, by using the print option at the bottom of the page.
