Number	Name	Description	Benefit/Value
1	CSV download	This allows employers at any point to download contact applicant details who apply for a job. Only Super users can download this information, pre shortlisting.	Employers can download all the contact details so that they can easily batch-contact several users.
2	BSA admin lite	The Customer Contact Services (CCS) has a new role called BSA Admin lite. Employers from organisations will contact CCS with NHS jobs issues. The new role allows the customer contact agents to validate employer's details and role, who contact them with queries.	Customer contact users can validate the identity of callers (employers) before helping them with their NHS jobs request.
3	View-only version of pre-employment checks for Recruiting managers	This allows the Recruiting manager to view an applicant's pre-employment checks as well as the details of the checks.	To allow Recruitment managers to see how pre-employment checks are progressing. It also provides a view of their applicants so they can see the people who are applying for jobs.
4	Scoring page improvements including introduction of 'in progress' flag	This enables a new 'In progress' flag to be displayed when the employer returns to an incomplete scored application.	To allow people who are scoring applicants to save a draft copy during scoring.
5	Role and permission fixes on different epics	We've made some improvements to roles and permissions within the service to make it easier and clearer for users to manage. For example, Recruiting managers are now able to create interviews and send invites to applicants.	To ensure the roles and permissions are working as expected.
6	Rolling recruitment	Allows an employer to keep a job listing live by creating a copy of the published job and transferring submitted applications to progress their recruitment.	Allow adverts to always be live and for employers to progress with the recruitment of applications.
7	Other enhancements	An enhancement to ensure that employers can select the application reference and view the application details throughout the offline scoring journey.	To ensure the application details are always viewed, even when the application is scored offline.
8	Reporting permissions	Users who have the Team manager role and permissions can now run reports.	Improved access to reporting.
9	Report file names	When running reports, the file names included extra characters. We've removed the extra characters, so the file names now match the report	Clearer report names.

		names.	
10.	Equal opportunities for a specific job report	Users can change the auto-generated reference when creating a job listing. Users can now run the 'Equal opportunities for a specific job' report for changed job listing references.	Improved access to reporting information.
11.	Vacancy bulletin report	We've made minor changes to align the content of the report with the rest of the service.	Consistent content.
