Q&A

Will the SSPs apply to cross-border prescriptions?

Yes. Patients from Scotland, Wales or Northern Ireland who present their prescriptions for fluoxetine 30mg capsules in England are eligible to receive an alternative supply under the terms of the SSP (only where pharmacists consider it appropriate to do so using their professional judgement).

Does the SSPs apply to private prescriptions?

Yes. The scope of an SSP applies to valid prescriptions that meets the requirements of the Human Medicine Regulations 2012, so it would cover both NHS and private prescriptions, unless where it stated otherwise on the SSP itself.

Will prescription charges apply under an SSP?

Yes, patients who are not exempt from prescription charges would continue to pay for this as usual. The only circumstance in which patients would not have to pay for a prescription charge is where an SSP recommends a lower quantity to be supplied. Please note that the SSP for fluoxetine 30mg capsules does not recommend a lower quantity to be supplied, so patients will continue to pay prescription charges (unless they are already exempt). For more information please see the above guidance.

Can pharmacists use their professional judgement to supply an alternative fluoxetine product to patients that is not listed in the SSP e.g. dispersible tablets/ unlicensed/ special products?

Pharmacists are not able to deviate from the recommendations on what to supply to patients as outlined in the SSP for fluoxetine 30mg capsules. However, if pharmacists think that an alternative product not listed in the SSP would be suitable for the patient, they should either contact the prescriber to discuss this (with the patient's consent) or direct the patient back to the prescriber.
