

**Release date**

16 September 2021

Number	Name	Description	Benefit/Value
1	Offer improvements	We've made the content clearer and more concise in the 'offer' journey based on user feedback. We've added the wording 'pro-rata' after the pay if the employer offers a job that is not full-time.	User needs are being addressed to make this journey easier to follow. Adding the 'pro-rata' label also ensures that users know the salary shown will reduce based on the hours worked.
2	Cookies banner	The cookies banner has moved to the top of the page, so that it is the first thing users see when they reach this page.  It also ensures screen readers read this out first and users can decide if they want to have this enabled or not.	The banner is in the most suitable place for users when first arriving at this site.
3	Bug fixes	Various bug fixes to improve the system performance.	

**Next release date**

30 September 2021
