

SERIOUS SHORTAGE PROTOCOL (SSP)

Reference Number: SSP013 **Version Number:** 1.0

This SSP applies to the following medicine

Name of medicine (including strength and formulation)	Atorvastatin (Lipitor®) 20mg chewable tablets
Legal category	POM

1. Details of medication to be supplied under this SSP

Name of medicine (including formulation and strength) to be supplied	Atorvastatin 20mg tablets
Quantity of this formulation	Total quantity supplied in accordance with this protocol is to be equivalent to the number of days supplied on original prescription.
	For every atorvastatin (Lipitor®) 20mg chewable tablet, the following quantity must – subject to the inclusion criteria below – be supplied in accordance with this protocol:
	1 x atorvastatin 20mg tablet
Substitution results in a change to whether the use is licenced	No

Scope for which this Serious Shortage Protocol (SSP) applies

The SSP applies to the	England and Wales
following parts of the UK	

Clinical situation to which this Serious Shortage Protocol (SSP) applies

Scope of SSP	All NHS and private prescriptions.	
	This protocol does not allow for the quantity supplied to be less than the number of days prescribed on the original prescription	

Criteria for inclusion	 The patient presents with a valid prescription (meeting the requirements of the Human Medicines Regulations 2012) for atorvastatin (Lipitor®) 20mg chewable tablets. The patient/carer consents to receiving the medicine supplied in accordance with this SSP. The patient should only be supplied in accordance with this SSP if the pharmacist is satisfied the patient understands and is able to accommodate the switch from chewable tablets to standard release tablets. 	
Criteria for exclusion	 All patients aged 10 years of age or above. Where the pharmacist, using their professional judgement, determines that the patient is not suitable to receive alternative medicine in accordance with this SSP. The patient presents with a prescription for a medicine other than atorvastatin (Lipitor®) 20mg chewable tablets. The patient presents a prescription which is not valid. The patient/carer does not consent to receiving the medicine(s) supplied in accordance with this SSP. Patients who have had a previous allergic reaction to atorvastatin 20mg tablets or their excipients. All patients under ten years old. Patients considered to be unsuitable or at higher risk need to be referred back to their prescriber promptly for further advice. 	
Cautions including any relevant action to be taken	Ensure that patients considered unsuitable for inclusion are promptly referred to their prescriber for further advice.	
Special considerations for specific populations of patients	Patients considered unstable or at higher risk need to be referred back to their prescriber promptly for further advice.	
Action to be taken if the patient is excluded	If a patient does not meet the criteria within this SSP then they should be referred back to their prescriber promptly.	
Action to be taken if the patient or carer declines the supply	If a patient/carer declines to receive medicine in accordance with this SSP, then they should be referred back to their prescriber promptly.	

Valid from:	18/11/2021
Expiry date:	12/01/2022

Reference number:	SSP013

2. Conditions under which this Serious Shortage Protocol (SSP) will operate

- The decision to supply any medicine in accordance with this protocol rests with the individual registered pharmacist who must abide by the protocol.
- Whilst pharmacy staff may support the dispensing process of the protocol, this
 must be carried out under the supervision of the registered pharmacist.
- Pharmacists using this SSP must ensure that it is only used within its authorised dates and within the criteria set out within the SSP. Pharmacists must check that they are using the current version of the SSP, particularly when referring to a hard copy version. Amendments may become necessary prior to the published expiry date. Current versions of SSP templates can be found at https://www.nhsbsa.nhs.uk/pharmacies-gp-practices-and-appliance-contractors/serious-shortage-protocols-ssps.

• Users must not alter, amend or add to the content of this document; such action will invalidate the SSP.

ADDENDUM

Supporting information on notifying other healthcare professionals

- Any items supplied in accordance with an SSP in response to an NHS prescription also needs to be supplied in accordance with NHS Pharmaceutical and Local Pharmaceutical Services Regulations.
- Those Regulations provide that where a therapeutic equivalent is supplied, a
 pharmacist will need to inform a patient's GP practice. This would generally be
 expected within the next working day, but further guidance would be given in any case
 where this applied.
- Where a different quantity, an alternative pharmaceutical form, an alternative strength
 or a generic equivalent is provided, it may not always be necessary that the patient's
 prescriber is informed, as the existence of the SSP may be enough for the prescriber
 to be aware that these changes in dispensing may take place, unless national
 arrangements agreed with the relevant representative bodies state otherwise.
 However, guidance may be issued on particular SSPs to indicate that prescribers
 should be informed of any patients that receive supply under it.
- In the absence of any preferred local alternate communication channels, all feedback to prescribers should be sent by NHSmail. The NHS Service Finder is a way for pharmacies to look up the email address of the patient's GP.
