Calculated Items

It is possible to perform calculations within ePACT2, you can do this using the 'New Calculated Measure' icon available via the analysis results pane:

As a result, you do not need to export data from the system to third party software to perform calculations.

In this example we are going to work out the percentage of items for NSAID's. We have one column showing the total items for the practice and one column showing the total for the practice.

1. From the results pane of your analysis select the 'New Calculated Measure' icon.

2. Select the 'Column' icon.

In calculated	Measure									?	>
Column Formula	Bins										
Fo	older Heading										
Col	umn Heading		onta	ins HTML/JavaScri	ipt/CSS Markup						
Aggregation Rule Available	e (Totals Row)	Defau	lt	▼ Column Formula							
Subject Areas		o,		I							
 PACT 2 Time Time Orga Drug Repo Patie 	Period nisation / Appliance rting Fields nt		>								

 This will display all available columns to include in your analysis, select the column you want to include, in this example we are going to select NSAID Items.

4. Click the end of the formula that has been populated in the 'Column Formula' pane.

Column Formula FILTER("Reporting Fields"."Items" USING (DESCRIPTOR_IDOF("ePACT 2"."Drug / Appliance"."BNF Paragraph plus Code") = '100101'	4

5. Ensuring your curser is at the end of the formula, and the formula is no longer highlighted, select the divide symbol from the formula taskbar.

6. The divide symbol will now be input into the formula.

Column Formula	
FILTER("Reporting Fields"."Items" USING (DESCRIPTOR_IDOF("ePACT 2"."Drug / Appliance"."BNF Paragraph plus Code") = '100101'))	

- 7. Again, click at the end of the formula to ensure the divide symbol is no longer highlighted.
- 8. Select the 'Column' icon.
- 9. Select the appropriate column from the list, in this example we are choosing 'Items'.

	The formula has now updated to show NSAID Items + Items.
	Column Formula
U	FILTER("Reporting Fields"."Items" USING (DESCRIPTOR_IDOF("ePACT 2"."Drug / Appliance"."BNF Paragraph plus Code") = '100101')) <mark>/"Reporting Fields"."Items"</mark>

- 10. Click the end of the formula to ensure no part of the formula is highlighted.
- 11. Select the multiply symbol from the 'Column Formula' taskbar.

Column Formula											
FILTER("Reporting Fields"."Items" USING (DESCRIPTOR_IDOF("ePACT 2"."Drug / Appliance"."BNF Paragraph plus Code") = '100101'))/"Reporting Fields"."Items"											
f() Filter Column ▼	Variable 🔻 🕴 -	x / % ()									

12. Again, click at the end of the input symbol and type 100 to complete the percentage calculation.

- 13. Name the column.
- 14. Select 'OK' to create your calculated column.

ew Calcula	ted Measure															?	×

Additional training material and user guides

The ePACT2 training team has developed several how to guides to help you get the best out of ePACT2. These can be found on our <u>ePACT2 user guides page</u>

Webinar sessions

We offer a free webinar training service to all our users and you can book as many sessions as you need.

Our webinar sessions are booked as 1hour slots and we offer a number of different sessions covering a range of topics.

We also offer bespoke sessions which are delivered just to you or your invited colleagues. You can let us know if you have any specific topics or reports you'd like to cover or if you would prefer an introductory tour of the system.

Our experienced trainers deliver these sessions using MS Teams and you can take part wherever you are as long as you can get online.

You can find our more and book your webinar by going to our ePACT2 training page
