Orthodontic Clinical Assessment

Dear **Name**,

As part of our routine orthodontic clinical monitoring procedures, we recently requested clinical records for a selection of patients from **Performer Name**. Our clinical advisers reviewed these records and have produced an orthodontic clinical assessment outcome report.

A copy of this report has been sent to the provider. If we receive any correspondence about this report from the performer or provider, we will forward a copy to you.

Our report uses a 'traffic light system' for grading clinical records, treatment needs, and the standard of treatment. This also includes advice to commissioners on the appropriate action to take:

- **Red** - Unsatisfactory, requiring further investigation. The commissioner should arrange an urgent discussion with the provider.
- **Amber** - Satisfactory, but where reservations were expressed for the provider to mitigate with appropriate action.
- **Green** - Good, satisfying all relevant criteria.

If you have any queries or comments, please contact orthosupport@nhsbsa.nhs.uk

We hope that you find the clinical orthodontic monitoring report useful.

Yours sincerely
