Why am I getting an invoice?

On a monthly basis the NHSBSA will recharge provider organisations for the costs of the items that they have prescribed and had dispensed in the community. These costs include both the cost of the items prescribed and the cost of dispensing these items.

The invoice splits these costs into a number of areas which can be reconciled using the information in ePACT2.

In this guide we will give you more information on what the costs relate to and which reports you need to access to reconcile them.

Invoice received

The invoice received from the NHSBSA will be split into 5 different lines.

Prescribing – This shows the drug costs of the items prescribed by the organisation plus the Retro Concession Price Adjustment value added together.

Unidentified prescribing - Contains all commissioner / provider prescribing which has been dispensed in primary care that cannot be linked to a specific prescriber or hospital unit but can be linked to the named commissioner / provider.

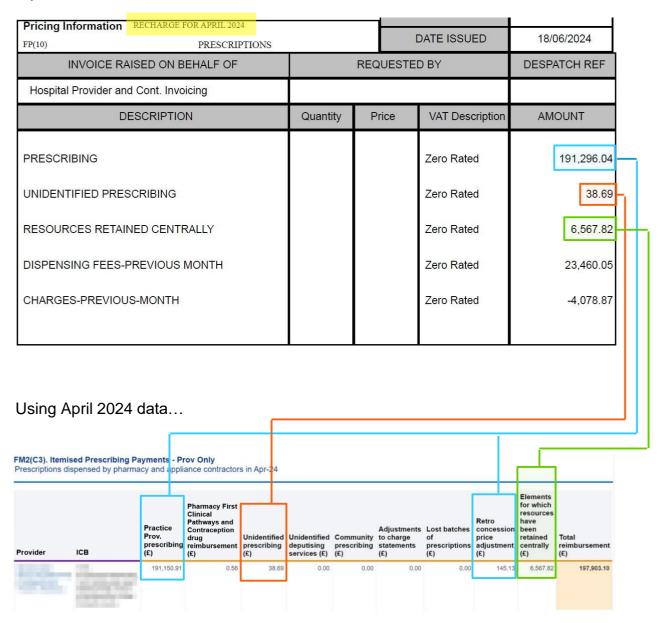

Resources retained centrally – Shows the cost of the resources retained centrally. This relates to costs which cannot be attributed to a specific organisation, such as nationally unidentified. These costs are collected nationally then fair shared amongst all organisations.

Dispensing fees - Previous month – Shows the dispensing fees associated with the items prescribed, more information on the elements which make up the dispensing fee can be found in the <u>Remuneration Report Glossary</u>. **Be aware the dispensing fees shown relate to the month prior to the month the invoice relates to**.

Charges - Previous month – Shows the prescription charges that have been collected for items the organisation has prescribed, this is the amount the patient has paid for their prescription. As the dispenser has already taken payments for this, the costs are credited back to your organisation. Be aware the charges shown relate to the month prior to the month the invoice relates to.

How to reconcile your invoice using the reports in ePACT2

Using the example invoice (Recharge for April 2024) on the previous page we will now reconcile each line using the appropriate ePACT2 financial reports – the Itemised Prescribing Payments (FM2) report and the Remuneration Values (FM6) report:

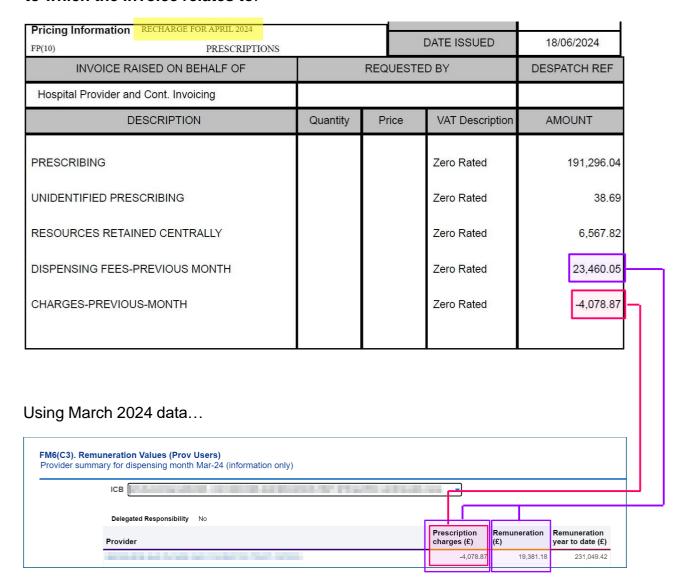

Prescribing – 191,296.04 – This figure can be reconciled on the Itemised Prescribing Payments (FM2) report, the report data is for the same month your invoice relates to. The 'Prescribing' value on the invoice is the sum of the 'Practice Comm/Prov Prescribing (£)' and the 'Retro Concession Price Adjustment (£)' values in the IPP report added together (shown above).

Unidentified Prescribing – 38.69 – This figure can be found on the Itemised Prescribing Payment (FM2) report, the report data is for the same month your invoice relates to and is the 'Unidentified Prescribing (£)' value in the report (shown above).

Resources retained centrally – 6,567.82 – This figure can be found on the Itemised Prescribing Payment (FM2) report, the report data is for the same month your invoice relates to and is the 'Elements for which resource have been retained centrally (£)' value in the report (shown above).

The 'Dispensing Fees – Previous Month' and 'Charges - Previous Month' figures on the invoice received can be reconciled using the Remuneration Values (FM6) report. Remember, these figures will be reconciled using the data for the month prior to which the invoice relates to.

Dispensing fees - Previous month – 23,460.05 – This figure is the sum of the 'Prescription charges (£)' value and the 'Remuneration (£)' value added together from the 'Remuneration Values - Summary' report, you will find these figures on the report for the month prior to the month your invoice relates to (shown above).

Charges - Previous month – -4,078.87 – This figure can be found on the 'Remuneration Values - Summary' report, you will find this figure under 'Prescription Charges (£)' on the report for the month prior to the month your invoice relates to (shown above).

Reconciling the prescribing costs

There are a range of reports available in ePACT2 which will help you reconcile the prescribing costs and the resource retained centrally shown in the invoice.

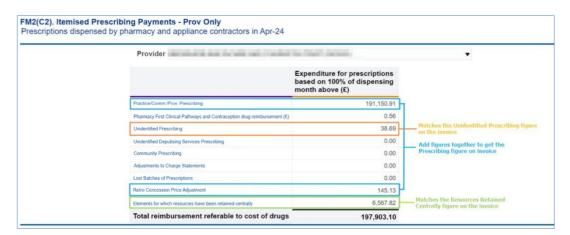

It is possible to break the prescribing costs down to individual unit/prescriber or presentation level.

The resources retained centrally can only be accessed at provider organisation level. This is because the costs are not attributed to specific organisations but are an accumulation of all the elements which could not be attributed back to a specific organisation within England such as unidentified prescribing, or VAT which are then fair shared out, according to the percentage of prescribing for your organisation.

Itemised Prescribing Payment (IPP) report

The IPP report will show the total prescribing costs, unidentified prescribing and the resources retained centrally which have been attributed to your organisation.

The costs shown in this report should match the costs shown in the first 3 lines of the invoice - Prescribing, Unidentified Prescribing and Resources Retained Centrally:

Invoice Reconciliation report

This report will allow you to break the prescribing costs shown in line 1 of the invoice down to the individual units/cost centres which have prescribed the items. This will be useful if you want to allocate the costs by unit at your Trust.

Two Invoice reconciliation reports are available relating to invoices for time periods pre- or post-April 2018. The appropriate report should be selected depending on the date of the invoice you want to reconcile.

The total figure for this report should match the prescribing costs shown in the invoice (Prescribing + Unidentified Prescribing):

The 'Accessing and using the Invoice Reconciliation Report' guide will provide more guidance on how to use the report.

Hospital Trust Volume & Cost report

The Hospital Trust Volume & Cost report will allow you to break the prescribing costs down to the individual drugs prescribed for a Trust. The information in the report is available at unit/cost centre and presentation level.

The total figure for this report should match the prescribing costs shown in the invoice (Prescribing + Unidentified Prescribing):

NHS Improvement - Model Hospital Report

Reconciling the dispensing costs

The dispensing fee and patient charges shown on the invoice can be reconciled using the Remuneration Report.

The remuneration cost covers fees paid to the contractor for the services provided in dispensing the prescription, such as payments for out-of-pocket expenses when they have had to source a product as it isn't something they would commonly keep in stock.

These fees are then charged back to the prescriber organisation, either directly for item level fees, or shared using a specified sharing method for fees which cannot be directly linked to a prescriber or organisation.

The sharing methods used for each element in the Remuneration Report are specified in the remuneration report glossary.

These charges are made in arrears. For example, April remuneration costs will appear on May's invoice, so you'll need to use the report for the month before the one the invoice relates to.

Remuneration report

The Remuneration Report includes a breakdown of the elements of the dispensing costs attributed to your organisation.

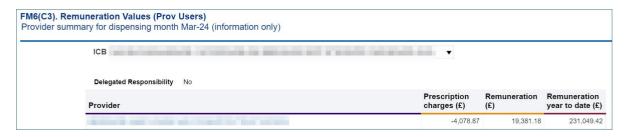

The report is available as both a summary and itemised report.

The summary report will show:

Prescription charges (£) - Shows the prescription charges that have been collected for items the organisation has prescribed for example, in the below image patients have paid £ 4,078.87.

Remuneration (£) – This will display the value for the month you have selected, for example the below image is showing the value for March 2024 (202403).

Remuneration year to date (£) – This will display the total remuneration value for the financial year up to the date you have selected, for example the below image is showing the value for the time period April 2023 (202304) to March 2024 (202403).

The itemised report will break these figures down into the individual elements which make up the remuneration:

FM6(C2). Remuneration Values
Provider itemised for dispensing month Mar-24 (information only)

	Remuneration group	Remuneration item	No. fees	% share paid	Remuneration (£)	Remuneration year to date (£)

The 'Dispensing Fees – Previous Month' value shown on the invoice will equal the 'Remuneration (£)' and 'Prescription Charges (£)' values added together.

The 'Accessing and using the Remuneration Report' guide will provide more guidance on how to use the report.

The information can be accessed at either provider organisation level so you can see the total remuneration attributed or can be broken down to the individual units/cost centres under your organisation.

Common questions

Below we have included some of the frequently asked questions regarding reconciling your invoice which may help if you are having any issues.

Q. The dispensing fees and patient charges shown on the invoice do not reconcile with the Remuneration Report.

Check that you are using the Remuneration Report for the correct month. Dispensing fees and patient charges shown on the invoice relate to the previous months Remuneration Report. Therefore, the invoice for July's prescriptions will reconcile with June's Remuneration Report.

Q. Charges are shown on the Itemised Remuneration Report for Appliance Infrastructure Payments, but my organisation has not prescribed any appliances on an FP10 Prescription.

Some of the cost, such as appliance infrastructure payments, are fair shared across all organisations so you may see costs for areas you haven't done. The elements which are fair shared and how this is done is detailed in the Remuneration report glossary.

Q. When using ePACT2 to split costs between each hospital unit, the total prescribing figure does not add up to the amount invoiced.

If you are creating your own report in ePACT2 to reconcile the prescribing cost on your invoice you may find that the costs don't match. There are a number of reasons why this may happen.

The cost shown on the invoice is the Actual Cost rather than the Net Ingredient Cost (NIC). When creating your own report make sure you've used the Actual Cost field.

Prescriptions that have been dispensed by a GP practice should be excluded from the data as these will have been charged to the SICBL of the GP practice. To establish where a prescription has been dispensed the dispenser code field should be included in the report.
